EDUCATION

Vellore Institute of Technology, Vellore

B.Tech, Computer Science and Engineering

JEE Advance 2024: 16484 | JEE Mains: 96 Percentile | 12th: 80% | 10th: 94%

2024 – Present

CGPA 8.9/10

TECHNICAL SKILLS

Languages:

Python, JavaScript, Kotlin, SQL, R, C, C++, Java, ASM

Deep Learning:

CNNs, RNNs, Transformers, GANs, Reinforcement Learning (GRPO), NLP, Computer Vision, LLM/SLM, Fine-tuning & Quantization

Mobile, Cloud, Platforms & Tools:

Kotlin, Flutter, Android, Docker, Git, AWS, Jupyter Notebook, Kaggle

AI & Machine Learning:

PyTorch, TensorFlow, Keras, Scikit-learn, Hugging Face Transformers, OpenCV, Pandas, NumPy

Web & Backend:

React, Node.js, Django, FastAPI, Flask, Express.js, REST APIs

Relevant Coursework:

Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems

EXPERIENCE

Startup Domain Head

Institute's Innovation Council, VIT Vellore

2026 – Present

Startup Ambassador

Institute's Innovation Council, VIT Vellore

2025 – 2026

- Guided students on incubation opportunities, startup competitions, and government innovation schemes.
- Collaborated with student teams and institute mentors to encourage participation in startup ecosystems

PROJECTS

TradingAgents | Python, LLMs, Multi-Agent Systems, yFinance

- Engineered a multi-agent trading framework combining fundamental, sentiment, news and technical analysts with bullish/bearish research debates to generate autonomous investment decisions.
- Implemented trade execution, portfolio risk management, position limits, sector exposure and stop-loss controls, followed by back testing against rule-based strategies using Sharpe ratio, returns and maximum drawdown.

AgroSense – KrishiSutra | Flutter, Dart, TensorFlow Lite, SQLite, Appwrite, LLaMA 3.1

- Built an offline-first agricultural intelligence app integrating mandi prices, weather, groundwater insights, crop roadmaps and on-device crop-disease detection across 38 classes using TensorFlow Lite.
- Implemented SQLite/Drift local persistence, sync queues and background Appwrite reconciliation, with a Vosk voice interface and LLaMA 3.1 AI assistant for low-connectivity environments.

PaisaProfit | React, Flask, Python, AI, Finance

- Built a full-stack gamified financial literacy platform featuring AI-assisted learning, paper trading, and interactive investment simulations.
- Developed scalable backend APIs and responsive frontend modules to deliver personalized finance education.
- Integrated real-time stock market data, interactive visualizations, and AI-powered learning experiences.

Predicting Heart Disease – Kaggle Playground S6E2 | Python, CatBoost, XGBoost, PyTorch, Optuna

- Developed an end-to-end machine learning pipeline using CatBoost, XGBoost, and PyTorch-based feature embeddings.
- Applied Bayesian hyperparameter optimization with Optuna, advanced feature engineering, and ensemble learning to improve leaderboard performance.
- Built reusable experimentation pipelines for model evaluation, cross-validation, and automated hyperparameter tuning.

AWARDS & ACHIEVEMENTS

1st Freshers Team | Track Winner

IIC Hackwar | Jan 2025

TOP 10

AGILE by Pravega IISc Bangalore | Jan 2026

Rank 79

ENIGMA - Codefest'26 IIT BHU | Feb 2026

Finalists

Reverse Coding ACM VIT | Feb 2025

LEADERSHIP & EXTRA CURRICULAR

Member, International Relations Committee, VIT — coordinating institutional and international events	02/2026
VITMUN - Delegated in AIPPM committee	03/2025
HITSMUN - Delegated in AIPPM committee	09/2025
SRMMUN - Delegated in LOK SABHA committee	10/2025

CERTIFICATES

Full stack web development and AI with Python (Django)
